
TODA'S QUALITY POLICY

TODA Advanced Materials Inc provides Nickel Hydroxide [Ni(OH)₂] for the global Lithium-ion Battery industry and wants to position itself to meet the emerging demand for cleaner, energy efficient, methods of power generation.

TODA's belief in the principles of sustainable development is evident in all stages of its operation, and through establishing achievable, manageable quality objectives, TODA will net positive global impacts for our customers and ourselves.

With a strong focus on our customers, we are committed to meeting all of their requirements, as well as all applicable statutory and regulatory requirements.

We achieve this commitment through the continual improvement of our Integrated Management System (IMS).

TODA'S ENVIRONMENTAL POLICY

TODA Advanced Materials Inc, is committed to participate in, as well as contribute to, the development of clean energy technology through advancing the maximum utilization of the Lithium-ion Battery Technology throughout the global markets.

In the pursuit of this goal we are committed to the protection of the environment, including the prevention of pollution and compliance to all relevant environmental laws.

Our management system is designed to help us continually improve its effectiveness with the goal of enhancing TODA's environmental performance.

We achieve this through continual improvement of our Integrated Management System (IMS).

Kazuyoshi Murashige, President

TODA, producing rechargeable battery materials for a greener future
